A non injury accident occurred at this mine on 1/18/2023 when the highwall of the limestone quarry collapsed at about 1500 hours. The huge landslide from the top of the highwall covered the benches below and overwhelmed the catch basing on the mine floor and partially covered an unoccupied Cat 966 front end loader. No miner will be permitted in the quarry except by MSHA authorization while this order is in place. This order, which includes all of the quarry and the crusher plant located on the quarry floor, is issued to assure the safety of all persons in the mine and will remain in place until it is safe to resume normal mining operations in the quarry. The operator will provide MSHA a written plan to recover the Cat 966 loader and a written plan to recover the benches and face stability in the quarry.
