**Re: Mid-Continent LST - File No. M-1982-121
RMR Aggregates, Inc.
Technical Revision (TR-6)
Technical Revision for Stipulated Agreement**

Dear Gregory Dangler:

On February 29, 2024 the Division of Reclamation, Mining and Safety concluded its review of the Technical Revision application submitted to the Division on November 29, 2023, addressing the following:

This revision provides answers to CODRMS questions related to the Mid-Continent Quarry geotechnical report. These are the redacted versions of the documents.

The decision reached by the Division is: approve. Approve the Geotechnical Engineering Report which proposes how to safeguard the highwall. The report has been reviewed by the Division's Engineer and all questions and comments have been sufficiently addressed. This TR does not authorize the Operator to initiate the methods discussed in the report. Nor does it allow the Operator to circumvent any other agency's requirements. A mine plan modification at a later date will be required to address specifically how the methodologies for safeguarding will be implemented on site. The Division will review the reclamation cost estimate under a separate revision.

The terms of Technical Revision No. 6 approved by the Division are hereby incorporated into Permit No. M-1982-121. All other conditions and requirements of Permit No. M-1982-121 remain in full force and effect.

Bond Held:	\$366,179.00
Prior Liability:	\$366,179.00
Change in Liability:	\$0.00
Revised Liability:	\$366,179.00
