**RE: Permit No. M-1982-121, Mid-Continent LST, Proposed SI-4 Reclamation Cost Estimate - Extension Request Approval**

Dear Mr. Wagner:

On August 27, 2024 the Colorado Division of Reclamation Mining and Safety (Division) sent you a proposed Surety Increase (SI-4) for above mentioned site. Given the potential range of actual costs for rock bolting the Division requested that RMR get three quotes for the task cost. The three quotes were due on October 25, 2024. On October 14, 2024, the Division was contacted by RMR to inform the Division that not all bids had been returned and that additional time may be needed. Additionally, the Division was advised that RMR may have questions or objections to the proposed estimate. On October 25, 2024, the Division received RMR's formal extension request and bonding comments. The Division will respond to the comments under a separate cover.

Your extension request is approved. A minimum of three quotes for rock bolting shall be due by **December 24, 2024**.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

**Amy Yeldell**  
Environmental Protection Specialist
