RETURN RECEIPT REQUESTED

Rocky Mountain Industrials
RMR Aggregates, Inc.
Attention: Mr. Brian Fallin, CEO
6200 S. Syracuse Way, Suite 450
Greenwood Village, CO 80111

Dear Mr. Fallin:

On May 29, 2026, the Bureau of Land Management (BLM) received the Rocky Mountain Industrials (RMI) revised proposed Plan of Operations Modification (BLM serial number: COC-074205) for the Mid-Continent Quarry, located in Garfield County, Colorado.

Consistent with the surface management regulations at 43 CFR 3809.411(a), the BLM has reviewed the proposed Plan of Operations Modification and has determined that it meets the content requirements at 43 CFR 3809.401(b). While the description of the Plan of Operations Modification is complete, the BLM cannot make a final decision on the proposed Plan of Operations Modification until it completes additional steps, including a technical review of the Plan of Operations Modification, the environmental review required under the National Environmental Policy Act (NEPA), any consultation required under the National Historic Preservation Act and the Endangered Species Act, and tribal consultation. BLM's completeness determination under CFR 3809.401(b) does not address RMI's separate request for a mineral materials contract or the disposal authority of any particular minerals. BLM intends to consider those requests separately within the technical review.

Additionally, under 43 CFR 3809.401(c), BLM requires additional information to ensure that your operations comply with subpart 3809. We will send future correspondence that outlines our information needs based on our technical review of the Plan of Operations Modification. RMI's timely response to these information requests is essential for the BLM to begin the public scoping and the NEPA process.

Be advised another step in the review process is for the BLM to solicit public comment on the Plan of Operations under 43 CFR 3809.411(c), either separate from or as a part of the environmental review process required by NEPA. Soliciting and responding to public comment must occur before making an approved/not

approved decision on the Plan of Operations Modification according to 43 CFR 3809.411(d).

Furthermore, BLM will notify you when you must submit an estimate of the cost to fully reclaim your operations as required by 43 CFR 3809.552. BLM will review your reclamation cost estimate and notify you of any deficiencies or additional information that must be submitted in order to determine a final reclamation cost.

Please be aware that this notification does not constitute authorization to commence operations nor is the submission of a complete Plan of Operations Modification necessarily adequate to meet the performance standards that are found in the regulations, including the unnecessary or undue degradation standard.

If you have any questions, please contact Brittany Cocina, Geologist, at (970) 876-9000 or bcocina@blm.gov.

Sincerely,

Elizabeth A. Dawson
Field Manager
